Gateway Certificate

COURSE

Official Course Module · Edition 2026

Course Overview

The **Foundation of Information Technology (FIT)** is TECH X ACADEMY's mandatory gateway program — the single course every student must complete before advancing to any specialization. Over 6 months and 24 weeks, FIT builds genuine digital competency from the ground up, blending technical tools, AI literacy, professional identity, and real-world mindset into one cohesive curriculum.

Equalizes the Classroom	Students arrive with vastly different backgrounds. FIT creates a single verified baseline before any specialization begins.
Identifies Strengths Early	Not every student is meant for programming. FIT lets instructors observe each student and guide them to the right track.

Builds Discipline First	Advanced courses demand consistency. FIT is where we watch attendance, attitude, and work ethic across 6 real months.
--------------------------------	---

At the end of the program, each student is formally evaluated. Their FIT score determines which advanced track they qualify for. This is not a filter — it is a foundation.

Computer Basics Hardware, OS, file systems, internet, typing	Microsoft Tools Word, Excel, PowerPoint & Outlook — real tasks	LinkedIn & Brand Digital identity, networking, job search
AI Fundamentals How AI works, ethics, where it's going	AI Tools Practice ChatGPT, Gemini, Copilot, Canva AI hands-on	Reality Check Careers, mindset, interviews, freelancing

Career Outcomes

- Mandatory prerequisite — no FIT completion means no entry to advanced courses.
- Job-ready for office, admin, data-entry, and virtual assistant roles.
- Capable of freelancing on Fiverr and Upwork from Day 1 after graduation.
- AI-literate — able to use tools that employers are actively hiring for in 2026.
- A polished LinkedIn profile and professional CV built during the program.
- Self-awareness: clarity on strengths, career path, and realistic next steps.

02 —

Why FIT Is Mandatory

TECH X ACADEMY made FIT mandatory for one reason: **we refuse to send half-ready graduates into the market.** Advanced courses in Data Analytics, Digital Marketing, and Software Development assume a baseline that many incoming students simply do not have. FIT is how we close that gap — for every student, without exception.

AI Awareness Is Non-Negotiable	Every career in 2026 touches AI. FIT ensures every TECH X graduate understands and can use AI tools responsibly.
Prevents Dropouts Later	Students who skip fundamentals are most likely to fail advanced courses. FIT dramatically reduces this risk.

Learning Objectives

By the end of this 24-week program, every student will be able to:

1	Navigate a computer confidently — hardware, OS, storage, internet, and peripherals.
2	Create polished business documents, CVs, letters, and reports using MS Word.
3	Build organized spreadsheets, apply formulas, and generate charts in MS Excel.
4	Design presentation slides and pitch with confidence using MS PowerPoint.
5	Manage a professional inbox, meetings, and workplace emails in MS Outlook.
6	Explain what Artificial Intelligence is, how it works, and where it is heading.
7	Use real AI tools (ChatGPT, Gemini, Copilot, etc.) for everyday tasks.
8	Build a complete, optimized LinkedIn profile and apply for jobs or freelance work.
9	Demonstrate self-awareness about their career, strengths, and realistic first steps.
10	Complete a full-scale Capstone Project integrating all skills from 6 months.

Course Structure — 24-Week Roadmap

The program is divided into 6 progressive months. Each month focuses on one major pillar while building on everything that came before. Every week ends with a practical assignment that becomes part of the student's portfolio.

Wk	Month	Topics Covered	Assignment	Tools
1	Month 1	Computer components, hardware vs software, input/output devices	Label a computer diagram — identify 10 parts	Windows
2	Month 1	Windows OS: desktop, taskbar, settings, file explorer	Organize a full folder structure for a student	Windows
3	Month 1	Internet basics: browsers, Gmail, Google Drive, cloud storage	Create a Gmail + Drive account, share a folder	Chrome / Google

4	Month 1	Typing practice, keyboard shortcuts, digital safety basics	Complete 30 WPM typing test — gateway pass/fail	Typing Tutor
5	Month 2	MS Word — interface, formatting, fonts, paragraphs, lists	Create a personal biodata with professional formatting	MS Word
6	Month 2	MS Word — tables, page layout, headers/footers, mail merge	Design a letterhead & run a mail-merge batch	MS Word
7	Month 2	MS Word — CV design, cover letter, document styles	Build a complete professional CV (final draft)	MS Word
8	Month 2	MS Excel — cells, data entry, SUM, AVERAGE, IF, charts	Create a monthly budget sheet with auto-totals	MS Excel
9	Month 3	MS Excel — VLOOKUP, pivot tables, dashboards	Build a sales report with pivot chart	MS Excel
10	Month 3	MS PowerPoint — slides, layouts, animations, design principles	Design a 10-slide product pitch deck	MS PowerPoint
11	Month 3	MS Outlook — email setup, folders, signatures, etiquette	Configure Outlook & write 7 workplace emails	MS Outlook
12	Month 3	Outlook calendar, meetings, tasks — integrated workflow	Schedule a meeting chain & send follow-ups	MS Outlook
13	Month 4	LinkedIn account setup, photo standards, headline & About section	Create & publish an optimized LinkedIn profile	LinkedIn
14	Month 4	LinkedIn networking, content posting, job search & Easy Apply	Connect with 50 professionals, apply to 5 jobs	LinkedIn
15	Month 4	Personal branding — digital footprint, what employers Google	Audit your online presence, write a brand statement	LinkedIn / Web

Wk	Month	Topics Covered	Assignment	Tools
16	Month 4	Freelancing intro: Fiverr, Upwork, client communication	Draft a Fiverr gig & build a sample portfolio	Fiverr / Web
17	Month 5	What is AI? ML, Deep Learning, LLMs — simply explained	Create an AI explainer poster for a classmate	Slides / Web
18	Month 5	ChatGPT & Gemini — prompting, use cases, limitations, ethics	Complete 5 real tasks using AI tools	ChatGPT / Gemini

19	Month 5	Microsoft Copilot in Word, Excel, PowerPoint	Use Copilot to build a formatted report 3× faster	MS Copilot
20	Month 5	AI for design: Canva AI, Adobe Firefly, image generation	Design 3 AI-generated graphics for a business	Canva AI
21	Month 6	Career reality: jobs, salaries, market demand in Pakistan 2026	Write a realistic 1-year career goal document	Word / Research
22	Month 6	Freelancing reality — income expectations, client psychology	Simulate a client conversation — role-play session	Live Practice
23	Month 6	Soft skills: communication, punctuality, professionalism	Recorded 3-minute professional self-introduction	Camera / Slides
24	Month 6	Final Project Week — integrated revision, live presentation	Submit & present the Final Capstone Project	All Tools

Detailed Course Modules

1 Computer Basics & Digital Foundations

Weeks 1–4 · Month 1

Before any tool can be learned, the machine itself must be understood. This module builds genuine confidence from the ground up — students finish Month 1 able to navigate any computer environment without assistance.

Foundation

- Computer types: desktop, laptop, tablet — components & their functions
- Hardware vs software — OS, drivers, peripherals
- Windows 11: desktop, taskbar, settings, file explorer
- Folder structure, file naming, storage (HDD / SSD / USB / Cloud)

Internet & Digital Safety

- Browsers, search engines, safe browsing habits
- Email accounts: Gmail setup, composing, attachments
- Google Drive, OneDrive — cloud basics and file sharing
- Cybersecurity: passwords, phishing awareness, digital safety

Typing & Efficiency

- Touch typing drills — minimum target: 30 WPM (gateway test)
- Essential keyboard shortcuts (Ctrl+C/V/Z/S/A and more)
- Screenshots, zoom, accessibility settings

2 Microsoft Office Suite

Weeks 5–12 · Months 2 & 3

The single most-valued skillset in any office, admin, or freelance role. Students move from zero to building real documents, reports, presentations, and managing a professional inbox.

MS Word — Professional Documentation

- Text formatting, fonts, alignment, bullet lists, line
- Tables, columns, headers, footers, page numbers, styles
- Mail merge for bulk letters & certificates spacing
- Professional CV design, cover letters, business letterhead & invoices

MS Excel — Spreadsheets & Data

- Data entry, formatting, number formats, basic charts
- Formulas: SUM, AVERAGE, IF, COUNTIF, SUMIF reports
- Sorting, filtering, conditional formatting, data validation
- VLOOKUP, pivot tables, mini dashboards & real

MS PowerPoint — Presentations & Pitching

- Slides, layouts, themes, master slide, transitions
- Design principles: contrast, hierarchy, white space
- Infographics with SmartArt, animations & timing
- 10-slide pitch deck design + live presentation practice

MS Outlook — Professional Communication

- Email setup, inbox folders, signatures, out-of-office
 - Calendar, meetings, tasks, reminders, professional tone
 - 7 essential workplace emails: apology, request, follow-up, leave, complaint, intro, thank-you
 - Managing a busy inbox with rules and folders
-

3 LinkedIn & Personal Brand

Weeks 13–16 · Month 4

Your digital identity exists whether you build it or not. This module ensures it works for you — students finish Month 4 with a live, job-ready LinkedIn profile and a clear freelancing starting point.

Profile & Identity

- Account setup, professional photo standards
- Crafting a powerful headline and About section
- Adding skills, education, certifications, and projects

Networking & Job Search

- Strategic connection requests — who, when, and how
- Engagement: posting, commenting, sharing professionally
- Job search filters, Easy Apply, recruiter DMs
- Recommendations and endorsements strategy

Freelancing Fundamentals

- Fiverr & Upwork — account creation, gig writing, pricing
 - Portfolio creation — what to include before the first order
 - Client communication: tone, response time, professionalism
-

4 Artificial Intelligence — Understanding & Application

Weeks 17–20 · Month 5

AI is not replacing professionals — it is replacing professionals who don't know how to use it. This module gives students a practical edge, not just theoretical awareness.

AI Fundamentals

- What is AI? ML, Deep Learning, Neural Networks — simply explained
- History of AI — from calculators to ChatGPT and beyond

- How Large Language Models (LLMs) work — zero jargon
- AI ethics: bias, misinformation, privacy, responsible use

AI Tools in Practice

- ChatGPT & Google Gemini — prompting, use cases, limitations
- Microsoft Copilot in Word, Excel, PowerPoint — AI-assisted productivity
- Canva AI, Adobe Firefly — design generation basics
- AI for research, summarization, translation, email drafting

IT Awareness

- Networking basics: IP, WiFi, LAN, internet vs intranet
- Cloud computing — what it is, everyday examples, why it matters
- Software types: SaaS, apps, web-based tools
- Emerging tech overview: AR/VR, IoT, Blockchain — awareness level

5

Reality Check

Weeks 21–24 · Month 6

The most honest module in the program. No false promises — real salary data, real market demand, and real tools for building a career in Pakistan's 2026 digital economy.

Career Awareness

- Job market realities: what pays well, what's in demand in Karachi/Pakistan
- Freelancing income reality: first 3 months vs first year — real numbers
- What HR managers and clients actually look for in 2026
- Common mistakes fresh graduates make — and how to avoid them

Mindset & Professional Development

- Growth mindset vs fixed mindset — practical drills
- Time management, discipline, consistency over motivation
- Communication skills: spoken English basics, clear articulation
- Body language, eye contact, confidence in interviews & presentations

Interview & Job Preparation

- Common HR questions — how to answer honestly and confidently
- Dress code, punctuality, first impression do's and don'ts

- Mock interview sessions — recorded and self-reviewed

- Goal-setting: write a realistic 90-day career action plan

Weekly Grooming Sessions

Every week includes one dedicated grooming session — not an optional extra, but a graded part of the FIT curriculum. The goal is the human side of every student: how they speak, present themselves, handle pressure, and carry their professional identity.

Phase	Focus Area	What You Will Learn
Weeks 1–4	Communication Skills	Spoken English basics, clear pronunciation, polite phrases, telephone etiquette.
Weeks 5–8	Confidence Building	Body language, eye contact, public speaking drills, overcoming stage fear.
Weeks 9–12	Digital Professionalism	Email tone, LinkedIn behavior, online etiquette, and digital footprint awareness.
Weeks 13–16	Interview Preparation	Common HR questions, mock interviews, dress code, recording and self-review.
Weeks 17–20	AI & Career Literacy	How AI changes jobs, what skills stay irreplaceable, talking about AI in interviews.
Weeks 21–24	Freelancing & First Steps	Niche selection, pricing yourself, getting first clients, avoiding early burnout.

Assignments & Final Project

Module Assignments

Computer Basics	Folder organization, hardware labeling diagram, 30 WPM typing test (gateway).
MS Word	Personal CV, business letterhead, invoice design, mail-merge certificate batch.
MS Excel	Household budget sheet, class result sheet with auto-calculations, pivot sales report.
MS PowerPoint	5-slide self-introduction deck, 10-slide product pitch presentation.
MS Outlook	7 professional email scenarios + 1 complete meeting scheduling workflow.
LinkedIn	Optimized profile, 50 strategic connections, 2 published posts, 5 Easy Apply jobs.

AI Tools	5 real AI tasks: email drafting, text summarization, image generation, formula help, research.
Reality Check	Written 90-day career plan + recorded 3-minute professional self-introduction video.

Final Capstone Project

In the final week, every student delivers an integrated business package for an imaginary company of their choice. The capstone is presented live to the class and evaluated by the instructor across creativity, accuracy, completeness, and confidence.

Word Document	A professional company profile or business proposal — print-ready, fully formatted.
Excel Dashboard	A sales, inventory, or HR data dashboard with pivot tables and charts.
PowerPoint Deck	A 10-slide pitch presentation delivered live in front of the class.
Outlook Email Chain	A simulated professional thread with a 'client' — written and formatted correctly.
LinkedIn Profile	A polished, complete profile reflecting skills acquired across all 6 months.
AI Tool Output	One task produced with an AI tool (report, graphic, or summary) with reflection.
Oral Defense	A 3-minute live presentation with instructor Q&A.;

08 —

Assessment System

Component	Weight	Details
Weekly Assignments	30%	Submitted at end of each week — graded on quality, accuracy & completion.
Monthly Quizzes	20%	Short quiz after each month covering that month's tools and concepts.
Final Capstone Project	30%	Integrated project graded on creativity, accuracy, completeness & live presentation.
Attendance & Participation	10%	Minimum 80% attendance required to qualify for FIT certification and course advancement.

Grooming Performance	10%	Communication, confidence, interview mock evaluation, and professionalism score.
COURSE ADVANCEMENT CRITERIA	Students who score 70% or above overall AND maintain 80%+ attendance are eligible to enroll in any advanced specialization at TECH X ACADEMY. Students below this threshold will be advised to repeat FIT or join a remedial track. This gate exists to protect every student's outcome.	

09 —

Fee Structure

PKR 2,000	6 MonthsMonthly Fee	PKR 12,000Duration
-----------	---------------------	--------------------

Payment Policy

- Monthly fee must be paid within the first **5 working days** of each month.
- A late payment fine of **PKR 200** applies after the due date.
- Fees once paid are **non-refundable** under any circumstances.
- All dues must be cleared before the Final Capstone evaluation.
- Installment arrangements may be considered — speak to admin in advance.

Certification

On successful completion of all modules, assignments, the Final Capstone Project, and the minimum attendance requirement, students will be awarded an official:

Foundation of Information Technology

Edition 2026 Official Certificate

This certificate is the formal entry credential for all advanced TECH X ACADEMY programs. It is suitable for your CV, LinkedIn profile, and freelance portfolios. Students achieving **Distinction (85%+)** receive a merit notation on their certificate.

A Message from the Instructor

“FIT is the most important course we offer — not because it is the most advanced, but because it is the most honest. In 6 months, you will learn tools, but more importantly, you will learn yourself. You will find out how disciplined you really are, how fast you learn, and where your real strengths lie. We designed this program to mirror real workplaces — because the world outside does not grade you on potential; it grades you on what you can actually deliver. Come ready to work. Come ready to be challenged. Come ready to leave different from how you arrived. I will see you in class.”

— Muhammad
